GASPPA

Nuclear Weapons Abolition for Our Sustainable Future

Our hope is to secure a future that all next generations enjoy peace and prosperity.

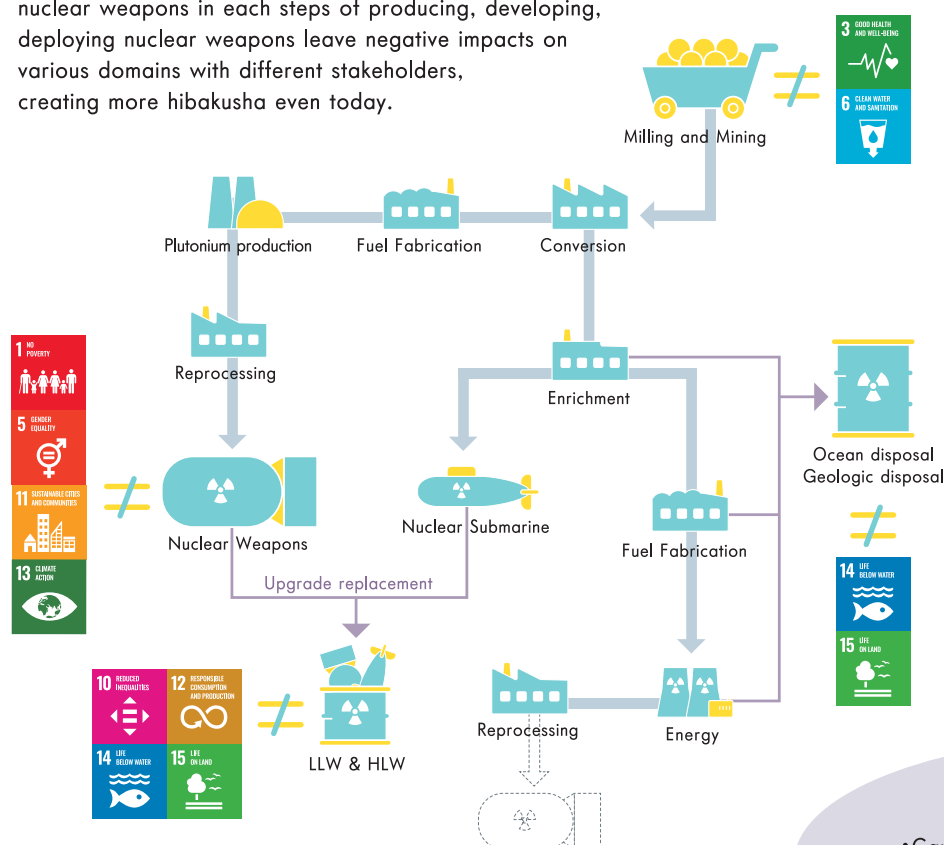

All humankind needs to reaffirm our awareness toward sustainability.

Nuclear weapon issues have long been discussed in the "security and law" and "humanity and ethics" discourse. "Sustainability" should now be an additional framework that ensures sustainable peace and prosperity for all.

Nuclear Weapons: Harming Sustainability

As mentioned in the TPNW, nuclear weapons in each steps of producing, developing, deploying nuclear weapons leave negative impacts on various domains with different stakeholders, creating more hibakusha even today.

We need to draw more attention to this "Nuclear Weapon- Sustainability Nexus" to severe ties between the nuclear weapons and the development discourses in order to properly locate its risks to our sustainability.

Three Global Crises

that Humanity currently faces

These global crises will deepen and amplify each other. Nuclear weapons only make them more serious.

1
The limits of the Earth
In the Anthropocene, human activities exploit the full capacity of the planet.

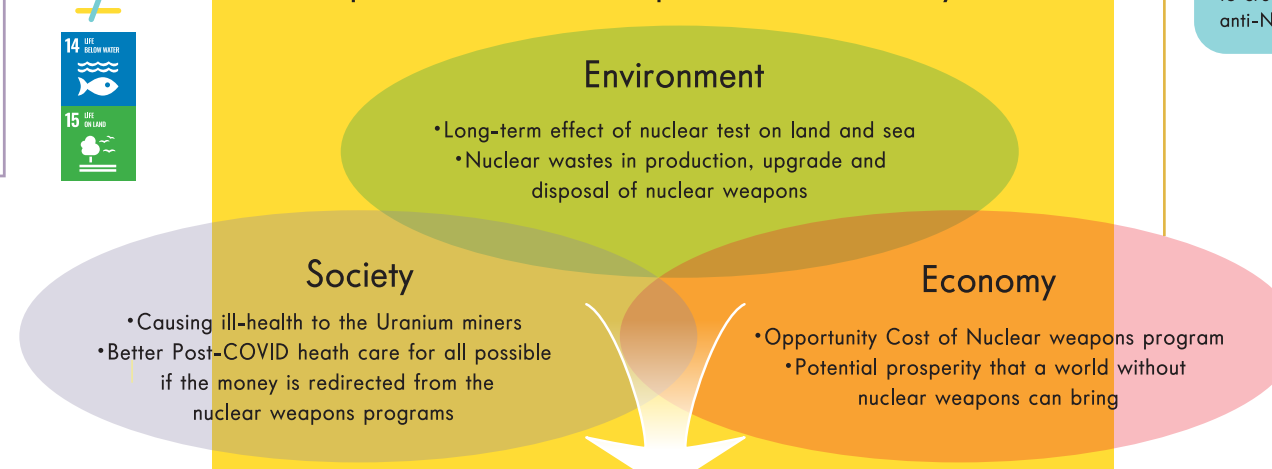

2
Great divisions of the world and society
Geopolitical conflicts, inequalities and intolerance expanded the divisions.

Nuclear Weapons

Humanity and the planet will pass the tipping point and head to unsustainability with catastrophic consequences unless we choose transformation to change our course now.

3
The Abuse of scientific and technological innovation
Humans face more risks as we pursue advancement of science and technology.

Examples of Nuclear Weapons – Sustainability Nexus

Combining wisdom of various stakeholders,

GASPPA will help develop their unique narratives to visualize how nuclear weapons only hamper sustainability .

Past, Present and Future of UN Global Agenda

Toward a Truly Sustainable World without Nuclear Weapons

As we push the agenda of eliminating nuclear weapons forward with the Treaty on the Prohibition of Nuclear Weapons, more public awareness and global norm against nuclear weapons can offer substantial support to move all governments, including the nuclear-weapon states.

Successful inclusion of nuclear weapons abolition in another global agenda will facilitate elimination of nuclear weapons by all countries for our better future.

GASPPA:

Global Alliance "Sustainable Peace and Prosperity for All"

In order to advocate the nuclear weapons elimination to be included in the Post-SDG global agenda to ensure "Sustainable Peace and Prosperity for All", GASPPA was launched in April, 2022.

We need to abolish

1. Nuclear weapon devices
2. Future hibakushas
3. Nuclear Weapon-reliant systems

What's GASPPA?

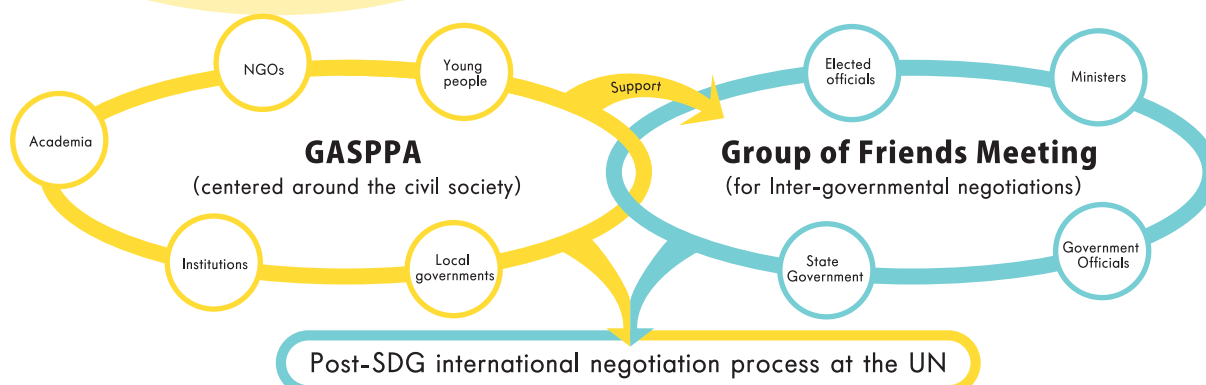

With the aim of making the elimination of nuclear weapons one of the UN's global goals for 2030 onwards (post SDGs), GASPPA will raise the issue of nuclear weapons from the perspective of sustainability and urge the international community to take action.

Major Activities

- 1 GASPPA will frame the issue of nuclear weapons in terms of the impact on society, economy, environment and many other areas from the perspective of sustainability, formulate and publish policy recommendations for raising the issue in the international community, and disseminate the information through campaign.
- 2 GASPPA will establish a Group of Friends consisting of government officials involved in diplomatic negotiations and support its activities. Group members will encourage their respective governments to join the Group of Friends.
- 3 GASPPA will provide support from the civil society sector for "An Agenda for Disarmament" and "Our Common Agenda" announced by the UN. Furthermore, GASPPA will lobby to ensure that the goal of eliminating nuclear weapons by 2045 is included in the "Agenda for Peace" to be formulated in the coming "Summit of the Future" and becomes part of the global movement toward the next development goals.

How GASPPA Works

Our goal is making the elimination of nuclear weapons one of the UN's global goals for 2030 onwards (post SDGs). To this end, GASPPA participates in the Post-SDGs international negotiation process as a civil society platform. Simultaneously, GASPPA supports "Group of Friends" that serves as a governmental networks sharing the common goal. Through these two routes, we aim to achieve the goal to include the elimination of nuclear weapons in the Post-SDGs global agenda.

Registered GASPPA Members as of April 4, 2022

[21 Organizations and 38 Individuals from 21 different countries has joined the GASPPA]

from: Cameroon, Canada, Czech Republic, Chile, Cote d'Ivoire, Ethiopia, Germany, Jamaica, Japan, Malaysia, Netherlands, Nigeria, Italy, India, Pakistan, R.O.K, Sri Lanka, Switzerland, U.A.E, U.K, U.S,

Join GASPPA

Global Alliance "Sustainable Peace and Prosperity for All" welcomes individuals and organizations. To join, support our founding statement and sign up from the website.
