Hiroshima Prefecture

Overview Edition

In work and life.
In villages and towns.
Achieving fulfilling lifestyles for all.

Peace of Mind ▸ Having Pride ▸ Taking on Challenges
Hiroshima Vision

That each and every resident of the prefecture is
“taking on challenges” to fulfill their hopes and dreams,
from a foundation of “peace of mind” and “pride.”

Revised Edition

1. Purpose of the Revision

- In 2020, Hiroshima Prefecture formulated the “Peace of Mind ▷ Having Pride ▷ Taking on Challenges Hiroshima Vision,” and has been working together with citizens, businesses, the national government, municipalities, and others to achieve it.
- Based on the results of past efforts and changes in socio-economic conditions, **the Hiroshima Vision has been progressively revised to realize our desired vision, and we will continue to work together with residents to promote the creation of a new Hiroshima Prefecture.**

[Period: From FY2026 to FY2030 (5 years)]

Changes in circumstances that have become apparent since the formulation of the Hiroshima Vision and require special consideration

Population decline progressing at a faster pace than expected

Rapid increase in the number of foreign workers and overseas tourists in the prefecture

Rapid innovation and spread of digital technologies and the development of related industries

Responding to the increasing severity and frequency of natural disasters and emerging risks

Inflationary trends, signs of wage increases, and increasing uncertainty in international and economic conditions

2. Key Points of the Revision

● Setting the direction for the next five years to achieve our desired vision

- The “family-friendly” concept, which was established in the “Hiroshima Future Challenge Vision” (revised in 2015), will be **deepened** into initiatives that take into account changes in socio-economic conditions, and will be **further developed** and spread to realize a Hiroshima Prefecture that is easy for everyone to live in for generations to come, and ultimately, that is attractive to both visitors and those connected to the prefecture. With this in mind, we will set the direction for the next five years toward realizing the vision of **“Shin (New) Family-Friendly: A community where families can live comfortably is a community where everyone can live comfortably,”** implementing policies based on the following five pillars.

<Five policy pillars aimed at achieving our desired vision>

“Creating future leaders and a society where people can have and raise children with peace of mind.”

“Creating an environment where people can live safe, secure, and healthy lives, both physically and mentally.”

“Creating attractions that can be enjoyed by all generations and instill pride in the community.”

“Creating jobs where a diverse range of individuals can thrive and find fulfillment in their work.”

“Creating attractive communities with an appropriate balance of dispersion and concentration, taking advantage of the proximity between urban areas and nature.”

● Setting key priorities to focus on over the next five years

- Amidst various socio-economic changes, the population decline, which is progressing at a pace exceeding expectations, poses a serious threat to the prefecture’s society and economy, including a contraction of economic activity due to a decrease in the working-age population and a shortage of people for sustaining local communities.
- Therefore, for the latter five-year period of the Hiroshima Vision, we will focus our efforts on the following five key areas, based on the concept of “Shin (New) Family-Friendly: A community where families can live comfortably is a community where everyone can live comfortably,” in order to curb population decline and realize sustainable regional and economic growth.

“Making Hiroshima the choice for young people”

“Making Hiroshima the choice for women”

“Making Hiroshima a great place to raise children”

“Establishing a strong socio-economic foundation”

“Passing on Hiroshima’s assets and experience”

Basic Philosophy

To create a Hiroshima Prefecture where people can truly feel, for generations to come, that they are glad they were born, raised, live, and work in Hiroshima.

Desired Vision

That each and every resident of the prefecture is “taking on challenges” to fulfill their hopes and dreams, from based on a foundation of “peace of mind” and “pride.”

In work and life. In villages and towns. Achieving fulfilling lifestyles for all.

[Basic concept for achieving our desired vision]

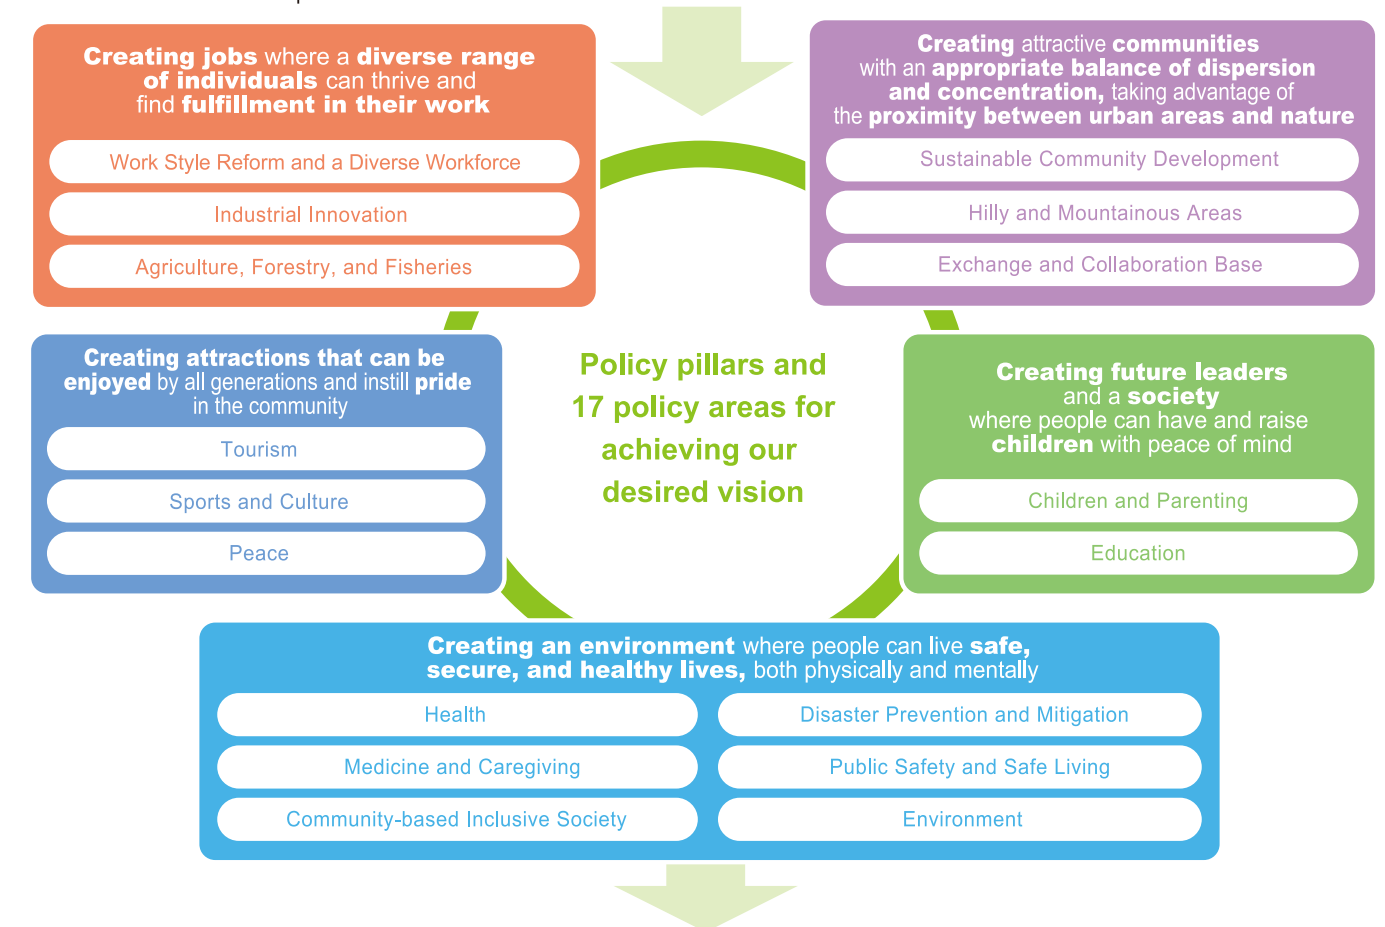

(1) Supporting residents as they take on challenges (2) Creating attractive communities with an appropriate balance of dispersion and concentration

Direction for the Next Five Years to Achieve Our Desired Vision

Shin (New) Family-Friendly

“A community where families can live comfortably is a community where everyone can live comfortably”

Enhancing the appeal of our prefecture and creating a society where a diverse range of families can live comfortably will lead to a society where everyone can live comfortably. Ultimately, we aim to create a “Shin (New) Family-Friendly” Hiroshima Prefecture that is appealing to both visitors and those connected to the prefecture.

Key Priorities to Focus on Over the Next Five Years

“Making Hiroshima the choice for young people”

“Making Hiroshima the choice for women”

“Making Hiroshima a great place to raise children”

“Establishing a strong socio-economic foundation”

“Passing on Hiroshima’s assets and experience”

Realizing a Hiroshima Prefecture where each and every resident is “taking on challenges” to fulfill their hopes and dreams, from a foundation of “peace of mind” and “pride.”
