

Global Nuclear Risks and How to Address Them

- Hiroshima Roundtable Outcomes Briefing -

FREE
ADMISSION

Amid an increasingly challenging international security environment, what nuclear risks could emerge over the coming year, and how should we respond? At the Hiroshima Roundtable, leading experts from Japan and abroad examined nuclear developments, identified potential risks, and discussed policy options for the international community.

The Hiroshima Roundtable is an international conference on nuclear disarmament and arms control, hosted by Hiroshima Prefecture and the Hiroshima Organization for Global Peace (HOPE), with the goal of advancing a peaceful world free of nuclear weapons.

At this Outcomes Briefing, participants will present the key discussions and outcomes of the conference. It is a valuable opportunity to hear directly from leading experts and gain insight into the nuclear risks facing the world today and in the year ahead. We warmly invite you to join us.
